

CS 506 lab 8 questions

May 2026

Questions

1. KNN has a long training time
 - (a) True
 - (b) False
2. if k is too large in KNN, this can lead to underfitting
 - (a) True
 - (b) False
3. What can we use to map the bodies of movie reviews to a space where we can run KNN?
 - (a) K-means
 - (b) DBScan
 - (c) LSA (Latent Semantic Analysis)
 - (d) Hierarchical Clustering
4. What distance function should we use to identify the semantic similarity of LSA-generated embeddings?
 - (a) Cosine
 - (b) Euclidean
 - (c) Manhattan
 - (d) Chebyshev

Solutions

1. False
2. True
3. LSA
4. Cosine
